SWE 444 Final Report

Cover page

• Project title
• Team members' names and Ids
• Section number

• **Supervisor**

Table of Content

Abstract

Introduce your project to the reader in a way that shows:
- The problem statement.
- The idea of your project and its target users.
- What value does your project add to the market and how it contributes to solving the above problem.

Technical Details (Platform – Language - Tools)

Talk in details and explain the platform, the programming language, and all the tools or programs you used while developing your project. Explain why you chose them instead of other platforms and tools and how was your experience overall.

Final Product Backlog

In this section, the team should describe the status of the features in the original product backlog and the newly added features. You can refer to the example below for better understanding. It is necessary to report every change in product backlog and the status of every feature.

Original product backlog status

Feature ID	Brief Description	Status	Comment
F02	User can manage account	Delivered	
F13	User can send results through email	Not delivered	The team realized the feature is not useful to the user and replaced it with a new feature

New features added to the product backlog

Feature ID	Brief Description	Status	Comment
F30	User receives notification on new updates	Delivered	This feature was requested by the product owner
F31	User can share results through twitter	Delivered	The team realized the feature is more useful and preferred to the user

System Features

In this section, fill in the table with your system features and their description under each sprint [see example below]. The description should adequately explain the feature.

Sprint no.	Release Date	Features	Description
Sprint 1	5/11/2017	Register	New user shall be able to register in the system by filling up name, email, password…etc
Sprint 2			
Sprint 3			
Sprint 4			
Sprint 5			

Acquired Knowledge

Talk about the knowledge you acquired and the skills you gained throughout this project including everything from managing the project and the team to development and technical skills.

Future Work

In this section, talk about enhancements and future work that could be done to improve your system such as features that can be added, improvement of an existing feature or enhancements related to the implementation and development of your system and platforms.

Conclusion

Conclude your document with a conclusion that briefly describes the idea and purpose of your system and its platform.
